

Hands-on!

4 digits separate your private or sensitive stuff from public access

With Code Handle®, personal belongings, sensitive client files or storage materials are easy to separate from public areas.

Code Handle works with an electronic PIN code. This way only authorised people, like staff, can unlock the door. Press the code on the handle's keypad and the door opens. Code Handle works together with your existing locking unit: keep your cylinder or lock and just change the handle

to a battery-powered Code Handle. No need to cable the door or connect it to the mains. No need to install an electronic access control system. Adding Code Handle to your door adds security and convenience to your private rooms in public areas.

The ASSA ABLOY Group is the global leader in access solutions. Every day we help people feel safe, secure and experience a more open world.

Share your space,
not your belongings

Experience a safer
and more open world

Hands off!

How do you protect your stuff in public spaces?

You don't have eyes in the back of your head. It's impossible to keep watch over every private door in a public-facing space — the store room in a retail shop or pharmacy, or a toilet for staff use only. That's when you need Code Handle: it stands guard for you.

Did I lock the door?
Rooms with high traffic can become a security risk

Sure, you could put a key-operated lock on every door. But then you have to keep track of the key, and remember where it is every time. For busy doors, chasing up keys becomes a full-time job. The solution is the simple, affordable Code Handle.

Easy to handle Give your doors an upgrade

Code Handle is the convenient way to keep the public out

Easy to install and retrofit

All it takes is two screws to fit a Code Handle on almost any interior door. You'll receive a Master Code and up to 9 different user PINs.

Autolock

How frequently do you enter and leave the store room? No more needing to remember to lock the door. Be key-free. If you like, even handsfree.

Keyless and convenient

Secure your private rooms with no keys, no wires and no expensive access control system. It's simple with Code Handle.

Enter your code

Access your stuff

Sometimes you need Code Handle to help control private access in public spaces

Archives

Important or irreplaceable documents deserve extra security

Drug storage

Controlled drugs and other medicines are safely protected by a secure PIN and handle

Store rooms

You can't always keep your eyes on everyone in your premises, especially when it's busy

Toilets

If the toilet is for customer use only, Code Handle keeps it locked without the hassle of a key

Offices

Because not everyone in the office should be reading what you left on your desk
